## Career summary

---

- I have more than 5 years of experience in the web development industry, 2 years of experience in team leadership with extensive experience in building and managing high-performing, diverse, and inclusive engineering teams that develop and maintain large-scale internet products. Participated actively with stakeholders and executive teams on technology, business strategy, product roadmap, engineering and corporate culture, hiring, and other aspects of leadership.
- I have experience in building and growing engineering teams from the ground up, managing the teams and products. Besides, I have a good blend of technical and management skills to identify and implement process and performance improvements in teams and products.
- I have extensive knowledge of JavaScript, web and related technologies and massive experience in designing scalability, high availability and high-performance, pattern.

## Work history

---

### Web Engineer / Open source enthusiasts

*April 2021 ~ so on*

Relax & learn something great!

-----

### Senior Web Engineer, Hivelab .Inc ([Homepage](#))

*Sep 2018 to April 2021*

**Skill:** *Pure html/css/js/gulp, Animation creator, VueJs, ReactJs, Bootstrap/Material/Vuetify*

**It takes time to cover all technical when play full-stack, so I decided to follow frontend engineer, an axiom.**

**Creative project.** : So many skill I had learned from beginning. It's Web accessibility, responsive website, cross-browsing, perfect pixel, mobile app(layout frontend) and many feature around FE, its so great!

- I validated customer problems, suggested the solution, and found user-focussed solutions by working directly with customers, interpreter & director.
- I managed the team with 5 members, we were responsible for the creative project.

- I tried to create perfect components, a clear html/css & follow several patterns where all particles with the right purpose were born.
  - Working with teammates & follow a clear proceed (scrum/agile) from the beginning helps me and my team figure out many-many bugs, save hours.
  - As the team leader (Not **Technical leader**), I care a lot of the performance, how the team feeling & what our team learned after projects. It's not all about the technical, is happiness.
  - **"The team leader's job is not to hold hands, and it's to help team members connect & grow."**
- 

## **Fullstack developer / Staff, Bss Group Company ([Homepage](#))**

*Nov 2015 to July 2018*

**Skill:** *Magento/php zenframework, Wordpress, HTML5/CSS3, JavaScript, jQuery, MySQL/MySQL server, nginx/ubuntu(linux), AWS e2e, Redis cache*

**Magento extension & project base :** Magento is a powerful online commerce platform that makes it easy for you to build a virtual storefront and sell directly to your customers. It comes with a lot of customizable options, which is obvious from the number of incredible themes available alone.

- I had created the extension, and its have on top 3 of the best extension of the year.
- I was the core developer of the project base, who handled the various features of frontend side (layout/animation, performance, ...)
- I worked with the PM & sometime with customer to understand the requirements of the project and finalize its scope.
- I played full-stack developer role in the project and joined in whole project process include designing, estimation, and implementation.

## **Education**

---

### **Web Engineering, FPT Polytechnic**

*September 2013 to April 2016*

- I completed 7 semesters grade Good (7.8 point average)
- I was chosen as Team leader for "HocSinh360" project (It's a school system manager, written in Laravel/PHP)
- I did an internship at ftp software

## **Scholarships**

---

- 2014 – I had 2 scholarships in semesters.
