Career summary

- I have more than 5 years of experience in the web development industry, over 3 years of experience in web application, as leadership with extensive experience in building and managing high-performing, diverse, and inclusive engineering teams that develop and maintain large-scale internet products. Participated actively with stakeholders and executive teams on technology, business strategy, product roadmap, engineering and corporate culture, hiring, and other aspects of leadership.
- I have experience in building and growing engineering teams from the ground up, managing the teams and products. Besides, I have a good blend of technical and management skills to identify and implement process and performance improvements in teams and products.
- I have extensive knowledge of JavaScript, web and related technologies and massive experience in designing scalability, high availability and high-performance, pattern.

Work history

Web Engineer / Open source enthusiasts

June 2023 ~ so on

Relax & learn something great!

Application Engineer, CreativeForce VietNam [(Homepage)](http://creativeforce.com)

March 2022 to May 2023

Skill: *Adobe Developer(ExtendScript), ReactJs/ReactNative, AngularJs*

> ***It takes time to cover and control all technical when play Adobe application and our's application, so I decided to follow web engineer.***

Adobe application devevloper : I research and learn the Adobe language to solve all requirements of our application. Simplify the **AdobePhotoshop** and **PremierePro**.

- The sample views: Link
- Proud to work as a Silver Technology Partner with Adobe

Modern framework javascript : I had switched each other several framework to solve all requirements of customers. Focus on performance, scalable, easy maintains, & quality.

Familiar with ReactJS/NextJS, GraphQL, Restful API, Jest

- **State management**: Flux architecture core, VueX, CompositionAPI state, Redux/ReduxToolKit, ReduxSaga, Zustand.
- **Scalable**: Nuxt architecture, Modular, big-thing first.
- **Quality follow**: Linting/formating by Prettier + ESlint, Husky & lint staged,...
- **Libraries**: Material/Antd/Vuetify/Bootstrap
- **Tooling**: Git, SVN, photoshop

Summary

- I validated customer problems, suggested the solution, and found user-focussed solutions by working directly with customers, interpreter & director.
- I tried to create perfect components, a clear HTML/CSS & follow several patterns where all particles with the right purpose were born.
- Working with teammates & follow a clear process (Agile/SCRUM) from the beginning helps me and my team figure out many-many bugs, save hours.
- Care the highly quality of code of our's application, I always bring the best solutions and how-to-optimize time of myself and the team.
- Another hand, working with mobile application Link I learned so many concepts and it makes me think out of the box.

Web Engineer, Hivelab .Inc [(Homepage)](Homepage)

Sep 2018 to April 2021

Skill: *Pure html/css/js/gulp, Jquery, Animation creator(ThreeJs), VueJS, ReactJS*

Creative project. : So many skills I had learned from the beginning. It's Web accessibility, responsive website, cross-browsing, perfect pixel, mobile app(layout frontend), and many features around FE, it's so great!

- I managed the team with 5 members, we were responsible for the creative project.
- Work with animation, for me - it's a challenge to smooth and control all elements work together.
- As the team leader (Not **Technical leader**), I care a lot about the performance, how the team feeling & what our team learned after projects. It's not all about technology, and it is happiness.

Fullstack developer / Staff, Bss Group Company [(Homepage)](Homepage)

Nov 2015 to July 2018

Skill: *Magento/php zenframework, Wordpress, HTML5/CSS3, JavaScript, jQuery, MySQL/MySQL server, nginx/ubuntu(linux), AWS e2e, Redis cache*

Magento extension & project base : Magento is a powerful online commerce platform that makes it easy for you to build a virtual storefront and sell directly to your customers.

- I had created the extension, and its have on top 3 of the best extension of the year.
- I worked with the PM & sometime with customer to understand the requirements of the project and finalize its scope.
- I played full-stack developer role in the project and joined in whole project process include designing, estimation, and implementation.
